

2019 NFCA FREE WEBINAR SERIES

All NFCA Webinars recordings and slide presentations are available in the [“Members Only”](#) Section at www.NFCA-online.org.

NFCA Code Update - 2021 Code, Looking Ahead

December 11, 2019 - Join NFCA's Executive Director, Bill McHugh as he explains the code development process and what will be in the 2021 International Building Code (IBC) and International Fire Code (IFC); and NFCA's proposals on special inspection and maintenance for structural fire-resistance. Hear about - and provide input on - what might be code proposals for the 2024 code. Bill will also report on the National Building Code of Canada's 2020 code development process.

What's Your Product IQ? Presented by Rich Walke, UL Codes and Regulatory Services

November 19, 2019 - Join NFCA and Rich Walke, UL Codes and Regulatory Services, will educate you on UL's new third generation online directory - Product IQ. There are many building, fire, electrical, mechanical and plumbing codes which require products, designs, systems and assemblies to be either listed or tested to a particular safety standard. How does one identify products, designs, systems or assemblies which meet these code requirements? Simple – through UL's new Product IQ online product directory.

The Importance of Maintaining Fireproofing in Existing Buildings

September 18, 2019 - Presented by Bill McHugh, NFCA Executive Director. This webinar covers fire-resistance and fireproofing in existing buildings; the code requirements for maintaining fireproofing and fire-resistance; and why it makes sense to maintain.

Intumescent Fire-Resistive Material (IFRM) - Questions from the Field on IFRM and UL 263

August 13, 2019 - Join NFCA and Ernst Toussaint, PE, Senior Steel Protection Engineer Manager, Hilti, as Ernst addresses questions and issues from the field regarding the application of IFRM and UL 263. Topics will include: Design optimizations and how steel sizes affect IFRM, types of structural steel members protected by IFRM, char expansions, approved primer / top coats, surface prep and more!

An Overview - Fire-Resistance, Testing, Installation, Inspection, Maintenance,

June 26, 2019 - NFCA Executive Director Bill McHugh will present this webinar, covering test standards used to evaluate fireproofing products that become systems when installed to the listed design, qualification requirements for contractors that install these complex assemblies, inspection agency personnel and company requirements, inspection, and fire code requirements to maintain fireproofing for the building life cycle.

Thermal Barrier Standards - Past, Present & Future

May 15, 2019 - Spray Polyurethane Foam (SPF) insulation provides great R-Values per inch thickness, helping meet rigorous energy code requirements. The application of SPF insulation in commercial applications has code requirements to use products meeting certain standards to protect the foam from catching fire and keep people safe in buildings. Don't miss this webinar presented by John Dalton, GCP Applied Technologies. Webinar available to view in the NFCA Members Only Section.
